wedi floor elements: new sizes for Fundo Primo; Fundo Discreto

Increased design freedom

Flush-to-floor showers are a byword for timeless design and are extremely functional. The directly tileable, waterproof Fundo shower elements from wedi GmbH offer an appropriate and attractive solution for any amount of space. New dimensions for the Fundo Primo flush-to-floor shower element and further development of the Fundo Discreto attachment element provide even more design freedom here for planning and realisation.

Perfection in design: Fundo Discreto

With the generally improved Fundo Discreto attachment element, wedi offers an outstanding installer and user-friendly alternative to classic drainage channels. The product creates an attractive wall drain very subtly and with little effort, and simply makes the channel, which was previously visible in the floor area, disappear. In the process, the Fundo Discreto offers all the benefits of a classic

floor drain with while also being very easy to clean. In combination with other wedi system components, the Fundo Discreto attachment element can easily be expanded in all directions. Whether as part of a seat or a full front wall, the design possibilities are practically endless with this system component.

New generosity: Fundo Primo

In both the square and rectangular design, wedi offers its fully sealed and directly tileable Fundo shower elements in a wide range of dimensions. Alongside the practical option of individually customising them on the construction site, the Emsdetten-based company now also offers additional, attractive standard dimensions in the range. So, for example, a Fundo Primo with point drainage in XXL format, with dimensions of 2000 x 1000 mm, is available from December 2018.
